

Advent Outsourcing Services: Cloud delivery

Focus on what you do best—let us handle the rest

Taking advantage of our cloud delivery service leaves you free to focus on managing your business, while our experts take care of your systems.

Advent Outsourcing Services offers a highly efficient, cost-effective alternative to on-premise software implementations—bringing you all the advantages of our mission-critical technology, without the in-house infrastructure and system maintenance burden. Taking advantage of our cloud delivery service leaves you free to focus on managing your business, while our experts take care of your systems.

Through cloud delivery, all the SS&C Advent applications you need to support your core investment management needs are at your fingertips, including:

- Portfolio management, accounting, and reporting
- Trade order management and compliance
- Fund order management and distribution
- Client relationship management
- Data services
- Reconciliation and data management
- Billing and revenue management
- Margin and finance management
- Research and knowledge management

The tried and trusted approach

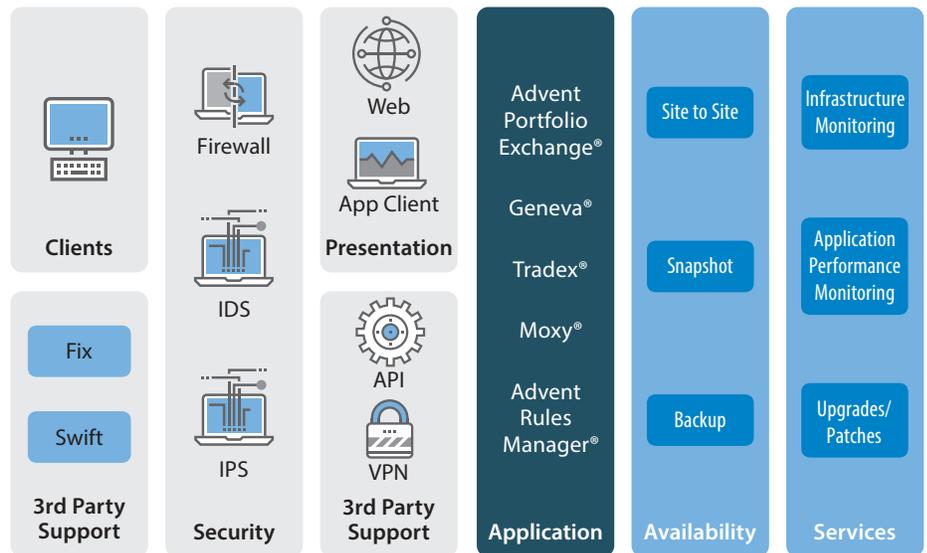

SS&C Advent has been delivering outsourced technology deployment options for more than a decade. Today, nearly 500 clients—ranging from small advisory firms to global institutions managing billions in assets and complex strategies—leverage our solutions via cloud delivery. With its unlimited scalability, reliability and operational flexibility, cloud delivery offers investment firms the most simple, efficient way to support your business and power your future growth.

Easy access to all your solution needs

Enjoy easy and secure access to SS&C Advent's industry-leading solutions and your latest data from anywhere, at any time. All it takes is an internet connection.

Advent Outsourcing Services

Infrastructure overview

Technology benefits without the risks

Lower total cost of ownership: Cloud delivery requires no additional hardware purchases or onsite software installation, allowing you to reduce your IT infrastructure footprint and overhead.

Greater ROI: Studies find hosted solutions deliver higher ROI on average than onsite deployments by reducing IT support costs and increasing efficiency.

Faster deployment: Because there is no hardware or software installation, you can be up and running in far less time than a typical onsite implementation. The service incorporates licensing for all supporting technologies, including Microsoft Office.

Simplified maintenance: Because SS&C Advent manages the computing infrastructure, we take care of all your hardware and software management and maintenance behind the scenes. This alleviates the burden on your IT staff and reduces your operational risk.

Easier upgrades: All updates, patches and version upgrades are made with minimal disruption to your business, ensuring you can take advantage of new technology and functionality faster and with less risk.

24x7 system monitoring: We monitor your entire infrastructure 24x7x365 to ensure you have a highly available production environment with optimal availability and uptime. Our server environments are built specifically to our application requirements to maximise performance. And because the teams monitoring and managing your infrastructure and software are certified experts with extensive experience of your environment, we can provide rapid, seamless resolution of any issues.

Robust security: We deliver your applications through a dedicated and secure cloud. And your environment is hosted in state-of-the-art, professionally-managed, certified and audited

data centers. They feature multiple physical, perimeter, transport layer and systems security features to safeguard your systems and data from threats and hazards.

Business continuity and disaster recovery: Comprehensive backup and disaster recovery procedures—including a multi-layered redundant infrastructure with real-time replication between facilities in the UK and Sweden—ensure your data is always protected and accessible, so you can continue to do business whatever the situation.

Outsource your operational pain points

Alongside the benefits of SS&C Advent's cloud delivery capabilities, firms can take advantage of our flexible managed services offering to outsource a variety of challenging operational processes. Managed services combines powerful middle- and back-office processing functionality with highly knowledgeable dedicated service teams to optimize your efficiency and productivity, reduce your operational risk and costs, and dramatically enhance your business scalability. And by outsourcing those functions, you can free staff to focus their resources and energy on truly productive, revenue-generating activities that will help grow your business.

Stay focused on what matters most

With cloud delivery you get all your mission-critical IT, support and services as an integrated solution from a one-stop shop. That leaves you free to focus on your core business priorities—managing investments and serving clients.
