“WHAT OUR CLIENTS HAVE TO SAY”

“When we were first looking at systems, we thought it was a ‘nice to have.’ But as soon as we fully implemented Tamale and put our whole team on it, we realized it’s a ‘need to have.’ After a while, it became pretty clear we’re not going to give it up.”

– Hedge Fund

“Tamale definitely fills a need for all-sized firms beyond research aggregation. You can actually use it in ways that add value and add alpha to your portfolio.”

– Asset Manager

“Tamale makes us better as an organization. We spend less time filing and searching for data and more time synthesizing key information to help inform our decision making as an investment team.”

– Hedge Fund
