Portfolio Management & Reporting

Oversee portfolios in the context of the entirety of a family client relationship or, through a centralized command center, look for subsets of entities within the family or view household by household. Insights are viewable at-a-glance through dynamic and configurable portfolio metric cards. You can also choose between the use of drag-and-drop functionality and pre-built templates to easily generate beautifully crafted reports that will show all of the family accounts and assets, including alternative assets and partnerships, which can be shared in the appropriate client's portal.
